

COMPLETE REMOTE PROTECTION

ACSS Telematics Combined with Maple Locking Solution

Remotely view & control vehicle cargo door locks through secure mobile app or web from anywhere.

Why Choose ACSS?

With over 20 years of experience in safety and security solutions for commercial vehicle fleets, ACSS has helped thousands of clients to increase their fleet safety records, reduce incidents & claims and achieve industry recognised safety standards.

Providers of vehicle CCTV, industry leading telematics and bespoke security solutions ACSS operate across multiple industries and sectors. From passenger transport to international haulage and logistics ACSS offer a national network of remote engineers performing on site installations at client locations.

ACSS are proud to partner with leading commercial vehicle safety & security provider Maple to provide Complete Remote Protection. Bespoke interaction of ACSS's telematics with one of the most secure and advanced locking systems on the market.

Why Choose Maple?

With over 50 years of expertise in cargo security, Maple offer a comprehensive range of industry leading, vehicle security solutions. From simple locking applications through to advanced electronic seals and load integrity systems, their innovative product range is designed to safeguard everything from panel vans to heavy goods vehicles.

Maple offer a versatile product portfolio, which caters for every door and body type, enabling fleet security management through a single, streamlined platform. Regardless of the vehicle type, model or provider, Maple offer TAPA TSRI-compliant locking systems to ensure the highest level of security for your cargo.

Developed for the high-value transport sector, whether it be pharmaceutical, fine arts or electronics, the solution integrates Maple's leading FreightLock IQ locking system with ACSS's AdvancedFleet Telematics. Allowing secure remote control of door locks from anywhere in the world, this additional layer of security provides peace of mind for fleet managers and operators over the security of their cargo.

Developed for the high-value transport sector, integrates FreightLock IQ locking system with ACSS's Telematics.
